

## Attention METRO CONTRACTORS

Metro's newest accessory item, the SMARTjack vent flashing, allows for easy contractor installation and simplified distributor inventory control. The beauty of the SMARTjack flashing is its ability to fit multiple roof pipes and therefore limit the need to maintain high inventories, a smart move for everyone. The SMARTjack is constructed of an all Aluminum base and pre-molded cone that's integrated with a rubber self-sealing gasket. It's this gasket that allows the 3-IN-1 SMARTjack to fit pipes from 1-1/4" to 3" in diameter. We also have a 3-IN-4 SMARTjack to fit pipes from 3" to 4" in diameter, so you're covered for virtually all your pipe flashing needs.

The aluminum base allows the SMARTjack to be molded to the contours of the Metro panel and can eliminate the time consuming double-pan flashing method (Sandwiching) of the vent flashing. They are available in Metro's standard stone-coated color range, so try them on your next roof and experience the difference of a factory stone-coated vent flashing from Metro.

### COLOR # STANDARD STONE COLORS

- 25-Beechwood
- 31-Birch-II
- 35-Charcoal
- 45-Mission red
- 50-Sage Green
- 55-Terra Cotta
- 60-Walnut
- 65-Weathered Timber

Western Wood color uses Weathered Timber accessories

### PREMIUM & CUSTOM COLORS

See Metro color policy for details.

The unique 'Pull-tab' feature allows for easy sizing to the pipe diameter on the roof as the flashing is installed.

Collar is heat rated to 180-degrees F continuous or 225- degrees F intermittent

**\* SPECIAL NOTE: Metro SMARTjacks are completely stone-coated including the rubber gasket seal.**
