

# SMARTSLEEVE PIPE COVER

Metro's newest accessory item, the Stone-Coated SMARTsleeve vent pipe cover, is the long-awaited item that provides a professional trimmed out look for most pipes on the roof. It allows for easy contractor installation on the most common pipe sizes, by merely sliding the Metro SMARTsleeve over the existing pipe after you have flashed it with a Metro SMARTjack flashing. A simple screw through the back of the sleeve into the PVC pipe secures it in-place. The SMARTsleeve is constructed of an all plastic design with both an inner and outer sleeve allowing it to fit either 1-1/4" - 3" diameter pipes or move to the next SMARTsleeve size to accommodate the 3" - 4" pipes.

The 'Cone' base section ensures a perfect fit over a Metro SMARTjack and almost eliminates the need for flashing sealant due to the double wall sleeve design. The top of the SMARTsleeve even has a "Critter guard" to prevent debris and rodents from entering the pipe, a problem in some heavily wooded areas. SMARTsleeves are available in Metro's standard stone-coated color range, so try them on your next Metro roof and experience the ease of install and smartest looking roof on the block.

Stone-Coated 'Critter Guard' fully integrated for extra protection.

Double-Wall design allows for fool-proof flashing

Cut-away SMARTjack & SMARTsleeve shown installed.

Existing Pipe is cut-down to show double wall construction.  
Flared base fits perfectly over a Metro SMARTjack flashing
